👤 PROFESSIONAL SUMMARY

I work at the intersection of Product, UX, and Business Analysis, with a strong background in designing internal enterprise systems. As a Product Design – ITBA, I help turn complex business processes into simple, usable, and scalable products by combining user-centered design with structured business analysis. My work includes stakeholder interviews, user flows, wireframes, prototypes, and product requirement documents, working closely with engineering teams from discovery to delivery. I believe great products are not just visually clean, but deeply useful, efficient, and aligned with business goals.

🖥 TECHNICAL SKILLS

Agile/Scrum

Documentation

User Acceptance Testing

MySQL / PostgreSQL

Requirement Analysis

Web Content Accessibility Guidelines (WCAG 2.2)

Site Maps

Responsive Web Design

User-centered Design

UX Research

Design Thinking

🛠 TOOLS & TECHNOLOGIES

▸ Figma

▸ Postman

📁 WORK EXPERIENCE

INNOCHEE JSC

Oct 2016 – Present

QC Engineer (Feb 2018 - Oct 2022)

- Design and maintain test scenarios, test cases, and test plans based on product and business requirements.
- Execute functional testing for web and mobile applications across multiple test cycles.
- Perform API testing to validate integrations and data flow between systems.
- Conduct database testing to ensure data accuracy, consistency, and integrity.
- Identify, report, and track defects, and work closely with developers to verify fixes.
- Support UAT and release validation to ensure product quality and stable delivery.

UI/UX Designer (Oct 2022 - Present)

- Create sitemaps, user flows, and wireframes to structure product experiences.
- Design UI for web and mobile applications based on product requirements.
- Contribute to building and maintaining the design system and design guidelines.

- ▶ Conduct UX research and ensure designs follow accessibility standards (WCAG 2.2).
- ▶ Build interactive prototypes to validate ideas and support stakeholder reviews.
- ▶ Work with product managers and developers to refine and improve design solutions.

Business Analyst (Sep 2023 - Present)

- ▶ Support in designing ERDs, database schemas, and system flows for internal applications.
- ▶ Create application flows, wireframes, and product designs with a strong focus on UX and usability.
- ▶ Prepare and maintain product and business documents (PRD/BRD, functional specs).
- ▶ Work with engineers to clarify requirements and learn to ensure technical feasibility.
- ▶ Participate in UAT testing and help verify that features meet business requirements.
